

Ingenico® 7780

Short Range Wireless Terminal

Cost effective and secure
Bluetooth wireless payment solution

Benefits at a Glance

- Ideal for pay-at-table restaurants, spa's, salons or any non-counter customer present environment
- Improve your customer experience and cardholder security by bringing the point of payment to your customer
- Short-range wireless payment terminal - Secure Bluetooth technology supports wireless connectivity to a range of up to 300 meters

The Ingenico® 7780 is the perfect terminal for any environment where it's either required or desired to bring the point of payment to your customer. Pay-at-table restaurants and customer-present retail payment environments such as curbside customer pick up and nail or beauty salons are all ideal environments for the i7780. Bringing the terminal to the cardholder improves customer experience and cardholder security - the card is always in your customer's control helping to ensure cardholder data is never lost or stolen. The i7780 terminal utilizes proven Bluetooth technology to support secure wireless payments within a 300 meter range from the i7780 communications base station.

Ingenico® i7780

Portability

- Short range Bluetooth enabled portability allows you to take the terminal to your customers anywhere on your premises - up to 300 meters from the communications base depending on your environment
- Removable, long-life Lithium Ion battery provides up to 5 hours or 200 transactions per charge, ensuring enough power to cover a complete shift - an on-screen battery indicator tells the operator how much battery time is remaining
- Communications and "charge only" bases offers a cradle for terminal storage and charge, ensuring terminals remain charged

Fast & Secure

- Bluetooth wireless technology - the most secure radio communication available in a payment device
- Secure integrated PIN pad meets all Visa®, MasterCard® and Interac® security requirements including PCI-PED and EMV
- Tamper-resistant casing to resist unauthorized intrusion

Wireless You Can Count On

- Communication base supports dial and Ethernet communications. Ethernet communication eliminates the costs associated with dedicated phone lines. Dial can be used as either primary or back up communications - in all cases, no wireless fees apply
- Supports multiple terminals through a single i7780 communications base helping to minimize both hardware and communications expenses
- Supports acceptance of Visa®, MasterCard® and Interac® debit through a single easy-to-use payment terminal
- Large backlit keypad and LCD display ensure clear visibility and usability, even in dimly lit environments.
- Quiet, fast and easy loading built-in thermal printer eliminates paper jams and prints receipts in either English or French
- Extended magnetic stripe reading path increases improves ease of use by ensuring successful read of first swipe

Durable, Dependable And
Portable Payment Terminal
