

Hypercom® Optimum T4220 IP

Fast, Powerful, Affordable

Versatility That Will Support
Your Needs Today & Tomorrow

Benefits at a Glance

- Leading technology
- Affordable
- Process transactions in as little as 4 seconds

The Hypercom® T4220 offers the speed and flexibility of payment processing through the Internet in a compact, ergonomic, user-friendly design. Leverage your internet connection to experience the convenience of 4-second transactions without the cost of a dedicated phone line. A unique IP diagnostic application and embedded help system simplify installation and troubleshooting. Say goodbye to paper jams; drop-in paper loading allows you to spend more time with customers and less time dealing with paper jams. The T4220 can efficiently process credit, debit and gift cards.

Hypercom[®] Optimum T4220 IP

Simple & Easy to Use

- 19 key ATM-style interface ensures ease-of-use and streamlines training
- Integrated thermal printer with drop-in paper loading virtually eliminates paper jams
- Small footprint minimizes use of counter space

Fast, Efficient & Secure

- Transactions complete within 3 to 5 seconds
- High-speed communications module supports DSL, cable and other IP-based communications eliminating the cost associated with a dedicated phone line
- Dial backup ensures that you can always process transactions, even if your Internet connection is unavailable
- Meets all latest security standards in the industry

Support For All Payment Types

- A built in PIN pad supports PIN-based debit and EBT transactions, or add an external PIN pad for easier customer use
- Supports gift card for enhanced customer service and increased revenues
